

## **Professional Qualifications**

Safety Enterprise, Inc. is an Occupational Safety and Health Consulting firm based in Meridian, Idaho and currently providing safety oversight and training services for clients in the Northwest.

Safety Enterprise, Inc., has available a cadre of highly experienced safety professional staff to respond to clients special needs. Our disciplines include Safety Engineering, Loss Control, Risk Management, Technical Writing, Labor & Management Relations and Occupational Safety and Health Administration (OSHA) Regulations, Department of Transportation (DOT) Hazardous Materials Shipping Regulations, and Mine Safety and Health Administration (MSHA) Compliance.

Our current scope of work involves Safety and Health Program development, program implementation, OSHA compliance, accident investigation, loss control management and Safety and health training. Our mission is to reduce incidents of work-related illness, injury and help companies simplify the process of regulatory compliance.

We offer injury prevention programs that include all of the above and provide employer assistance in preparing employers for acceptance in the various OSHA partnering programs currently offered in construction and general industry.

Federal OSHA, State OSHA plans and MSHA, frequently inspect workplaces where we provide safety oversight and compliance monitoring services. The results of our combined efforts with employers have lead to hundreds of examples of injury free workplaces and outstanding records of Zero Losses.

Our program is tested on a daily basis and our record speaks for itself. We don't believe in magic formulas. We know that preventing work related injury and illness and manage risks, will only be achieved by commitment, knowledge, and persistence.

Thank you for your consideration

Richard Fesler, President
