

Notes On Instructors

- I've taken a lot of safety training classes over the years and this one I actually learned a lot, thank you.
- Richard tried to keep it lively, fun, and educational. I realize that it is difficult with this type of material. Some of our questions, instead of answering them directly made us look up the answer in our handouts and show how to find the answer on the computer. I feel confident with what I learned. Kimberly
- Very well done. We could of spend several more hours in the class to learn more. I ready for another class from Richard. Travis
- Well-designed course – Specific to industry. Richard did a great job to fit the 10 Hours OSHA Class to my employees' environment.

Safety Enterprise, Inc **What our Clients are Saying**

Richard,

Thank you so much for all your input and direction. Troy was great to work with and resourceful. Ultimately, we want the people working on the job to go home safe. I feel, because of you and your staff, the jobsite stayed safer, cleaner, and more enjoyable to work in.

Sincerely, Construction Company Owner

We have worked with Richard for over a year as an external Safety and Health Consultant. As a fast-growing company Richard has supported us in many ways all of which began with a Safety and Health Assessment to get a baseline of where we stood. He help create our Safety and Health Manual, working with employees created Safety Committee, providing training and educations to all levels of workers. Richard continues to be a great source of information and guidance. We look forward in a long future of working together.

A pleasure to have worked with Troy on the project.
His professional approach to every situation was appreciated.
Whenever I needed an opinion, he was available and able to supply.
I'll keep you on my contact list for future projects.

Senior Project Manager – Richard

**Notes On
Instructors**

- Thank you for the great job. I liked how the class was tailored to our industry.
- I enjoy the class. Being able to share ideas and opinions with co-workers was also valuable. Was happy I had a chance to increase my knowledge in the area of Safety.
- One of the better classes I've been in over the ten years I've been doing this job.
- For being "boring" material it was presented well.
- I like the related stories and the extra slides and humor, kept it interesting.

Safety Enterprise, Inc

What our Clients are Saying

Rich,

We think very highly of your company and when we get started on the next project we will be asking for your help again. Troy has bent over backwards to help us with our safety program. We want to tell you what a great job he has done for us and how well he has represented your company. Hopefully we will be in touch soon.

Thank you,

Development Group
Senior Project Supervisor

Richard,

Pass along to your employees that they have done an excellent job in setting up the Forklift Rodeo, and being the official judges. You created an excellent challenge for the various operators to demonstrate their skills for the audience. We will be using your expertise again the next time we will be hosting corporate family day with a forklift rodeo.

Production Manager

Richard

Thank you again for helping us thought that unfortunate OSHA citation. Your knowledge and experience working with OSHA inspectors and guiding us through the abatement process help us tremendously improve our companies overall Safety fitness. Without you expertise we would of rolled over and just paid the fine and continued on not fully understanding what was the correct way to conduct the work and be safe. Although we appreciate the drastic OSHA fine reduction we understand that the time and expense on getting on the correct path as a company is well worth it for all of our employees. Thank you again.

Owner - Boise Manufacturing Facility
